PROFESSIONAL SUMMARY

Computer Engineering student with hands-on experience in MERN Stack development, Java, Python, MySQL, and MongoDB. Completed full-stack development internships and built real-world web applications involving frontend, backend, databases, APIs, and AI features. Strong interest in software development, problem solving, and responsive web applications.

SKILLS

Programming: Python, C++, Java (Beginner)

Frontend: React.js, Bootstrap

Database: MySQL, MongoDB

Concepts: OOP, Data Structures & Algorithms

Web: HTML, CSS, JavaScript

Backend: Node.js, Express.js

Tools: Git, GitHub

Certification: Full Stack Development

EDUCATION

B.E. Computer Engineering | SPPU

2023 – 2027

CGPA: 9.071

1st – 3rd Year

XII (HSC) | Jr. College Kukana

2023

60.0%

X (SSC) | S.M.P.M.V. Tarwadi

2021

85.2%

EXPERIENCE

Full-Stack Web Development Intern

Jan 2026 – Feb 2026

SUMAGO INFOTECH PVT LTD

- Developed responsive full-stack web applications using the MERN Stack.
- Worked with React.js, Node.js, Express.js, MongoDB, and Bootstrap.
- Collaborated with team members using Git and GitHub for version control.

Full-Stack Web Developer Intern

Apr 2026 – Jun 2026

Kanak Digifex NexGen Pvt. Ltd.

- Worked on client projects involving frontend and backend development.
- Assisted with debugging, testing, API development, and project implementation.
- Supported client coordination, project tasks, and development workflow.

Full-Stack Web Development Intern

Aug 2026 – Nov 2026

The Baap Company

- Working on real-world web applications across frontend, backend, database, and API development.
- Contributing to development, debugging, testing, and application improvements.

ACADEMIC PROJECTS

TradeSense AI – Stock Market Analysis & Portfolio Management Platform

MERN + AI

- Built a stock analysis platform using React.js, Node.js, Express.js, MongoDB, REST APIs, and interactive financial charts.
- Added market data, watchlists, virtual portfolios, P&L tracking, and paper trading with simulated buy/sell orders and portfolio management.
- Integrated RSI, MACD, moving averages, AI-based trend prediction, news sentiment, risk insights, and configurable market alerts.

DriveLux AI Based Car Rental Web Application

MERN Stack + AI

- Built a full-stack car rental platform using React.js, Node.js, Express.js, MongoDB, and Mongoose with user and admin dashboards.
- Added vehicle search, filtering, JWT authentication, booking management, conflict prevention, dynamic pricing, and role-based access.
- Integrated AI vehicle recommendations, demo payment options, PDF invoices, loyalty features, and booking management APIs.

ACHIEVEMENTS

- **3rd Rank** – Blind Coding Competition, 2nd Year (Individual)
- **2nd Rank** – Debugging Competition, 3rd Year (Group)
- **Inter-Department Kabaddi Champion** – 1st & 3rd Year
